FIRE SAFETY INSPECTION REPORT

FRESH FASHION WEAR.
638 SHARIFPUR, NATIONAL UNIVERSITY GAZIPUR
SADAR

OTHER FACTORIES: FASHION APPARELS LTD.

September 2, 2014
SUMMARY
Fresh Fashion Wear. was surveyed for fire safety on 9/2/2014 by Hughes Associates, Inc. This summary identifies the major deficiencies that were identified during the inspection.

The purpose of this survey was to identify significant fire safety issues and to provide recommendations for remediation based on applicable standards specified by the Accord. The scope of this initial fire safety inspection was limited to the review and identification of major fire safety issues. The inspection did not include identification of minor deficiencies, which will be further addressed as part of follow-up inspections.

Table 1 summarizes the major fire safety issues identified during the inspection. Recommendations have been provided to address each issue.

An implementation schedule shall be developed by the factory to remediate each of the findings. The specific timing of improvements, including any requested extensions due to design / installation constraints, shall be submitted to the Accord for approval.
Table 1. Findings And Recommendations

<table>
<thead>
<tr>

<tbody>
<tr>
<td>F-1</td>
<td>Fire Rated Construction</td>
<td>The boiler and generator rooms are not separated by fire-rated construction (openings, non-rated doors and penetrations).</td>
<td>Separate the boiler and generator room by a minimum 2-hr fire-rated construction. Seal and/or protected all openings to maintain the required fire separations.</td>
<td>Within 3 months</td>
</tr>
<tr>
<td>F-2</td>
<td>Fire Rated Construction</td>
<td>Rooms used for combustible storage on the 2nd floor are not separated by fire-rated construction.</td>
<td>Provide dedicated storage rooms separated by minimum 1-hr fire-rated construction.</td>
<td>Within 3 months</td>
</tr>
<tr>
<td>F-3</td>
<td>Fire Rated Construction</td>
<td>All exit stairs are not separated from work areas on each floor by fire-rated construction.</td>
<td>Provide minimum 1.5-hr fire rated doors and seal all unprotected openings to separate the exit stairs from work areas and other factory spaces on all floor levels. Ensure that the fire doors are self-closing and positive latching and that they are provided with fire exit (panic) hardware where serving production floors. If fire doors are required to be held open for functional reasons, provide automatic-closing devices tied to the fire alarm system.</td>
<td>Within 3 months</td>
</tr>
</tbody>
</table>
Fire Rated Construction

Unsealed penetrations and openings are located in the south and north exit stair enclosures on the ground and 2nd floors.

Seal all penetrations and openings in exit stair enclosure walls to maintain the fire separation.
